SUMMARY

Computer Science student at Cracow University of Technology with hands-on experience across software development, QA and DevOps. Currently a full-stack developer intern at Unit-Unicorn, working in Python / Django REST Framework, React and PostgreSQL. Previously completed two R&D internships at ABB: built automated, regression and unit tests in C# (Selenium, Appium) and JavaScript (Cypress), and maintained CI/CD pipelines and virtual machines in Azure DevOps. Technician background in teleinformatics and computer networks. Certified Professional Scrum Master (PSM I), used to working in Scrum teams and communicating daily across QA, development and DevOps.

EXPERIENCE

Unit-Unicorn

Full-stack developer internship

Cracow, Poland
08/2026 - present

Responsibilities included:

- Implementing cloud file storage synchronisation in Django REST Framework using the Google Drive API
- Fixing navigation, rendering and UI consistency defects in a React single-page application
- Debugging across the stack with browser developer tools, container logs and database queries
- Working with Git feature branches, pull requests and code review; tracking tasks in Jira, documentation in Confluence

Stack: TypeScript, Python ▪ Frameworks: React, Django REST Framework, MUI ▪ Tools: Git, GitHub, Docker, PostgreSQL, Jira

ABB

QA internship - R&D

Cracow, Poland
10/2022 - 11/2022

Responsibilities included:

- Performing manual and exploratory tests of a desktop application and Microsoft HoloLens
- Creating automated and regression tests for the desktop application using C#, Selenium and Appium
- Creating unit tests; reporting and tracking defects
- Analysing requirements and development tasks to define the scope of required test validations
- Participating in Scrum meetings and direct communication with QA, Frontend, Backend, IT and DevOps teams

Stack: C# ▪ Framework: .NET ▪ Tools: Git, Azure DevOps, Appium, Selenium ▪ Agile methodology: Scrum

ABB

DevOps internship - R&D

Cracow, Poland
04/2022 - 05/2022

Responsibilities included:

- Creating automated and regression tests in JavaScript for a web application using the Cypress framework
- Creating and maintaining CI/CD pipelines in Azure DevOps
- Creating and maintaining virtual machines used as Linux and Windows test environments
- Performing manual tests and validating REST services with Postman

Stack: JavaScript, HTML, CSS ▪ Framework: Cypress ▪ Tools: Git, Azure DevOps, Postman ▪ Agile methodology: Scrum

iSpot Apple Premium Partner

Brand Ambassador - iStudies

Cracow, Poland
09/2025 - present

- Representing iSpot's Apple education programme among students and universities; running on-campus activations
- Advising peers on Apple hardware, software and education offers

Kościuszkon

Marketing Coordinator

Cracow, Poland
12/2024 - 06/2025

- Managing social media channels and email campaigns; creating and optimising paid Facebook and Instagram campaigns

Projects

Stock Market Demo + Analytics

A JavaFX desktop application simulating a stock trading platform: live market data from the Yahoo Finance and Binance APIs, interactive line and OHLC candlestick charts, and a demo account with buy/sell orders, Stop Loss/Take Profit triggers and portfolio management. Includes an AI-powered candlestick pattern analyzer and automatic PDF tax report (PIT-8C) generation.

Stack: Java 17 ▪ Framework: JavaFX 21, Apache PDFBox ▪ Tools: Git, Maven

EDUCATION

Cracow University of Technology

Bachelor of Science - Computer Science

Cracow, Poland
09/2024 - present

Upper Secondary School of Communications

Technician - Teleinformatics

Cracow, Poland
09/2019 - 09/2024

ADDITIONAL INFORMATION
